

# April Newsletter

Well, March definitely came in like a lion and I have to say, I was very happy that it left like a lamb! The kids had fun keeping our chart of lamb and lion days. We were very lucky to have had many lamb days! April is here and we are looking forward to being outside again; playing, laughing, and breathing that beautiful fresh air! April is National Humor Month so take the time to laugh! Research says that it truly does the body good!

Before Easter break, I used “Resurrection Eggs” to tell the story of the ultimate sacrifice that Jesus made to save us all from sin and so that we may have eternal life. It was my wish that on Easter Sunday, the children will have remembered some part of the story and maybe shared it with their families as they celebrated and rejoiced. at the miracle of His Resurrection!

I hope you have enjoyed the creativity the children have expressed on our outside wall and bulletin board. We had many great responses for our version of *Green Eggs and Ham*. We also created some really new & unusual animals with our *The Mixed Up Chameleon* unit! The children were also treated to a Dental Health puppet show from Miss Gayle, a dental hygienist.

This month, will we be learning about our 5 senses. This is a theme that I truly enjoy because it is so interactive and it is wonderful to behold the looks on the children’s faces during our smelling, tasting and touching days! I am sure they will let you know what they experience! We will learn about insects, birds, ovals, farm and baby animals, pond life, rain and what it means to celebrate Earth Day. God gave us a beautiful place to live and we want to show our appreciation by respecting the life and gifts the Earth gives us!

Happy Spring!
